

Anhydrous Hydrogen Fluoride, AHF

Description

Anhydrous Hydrogen Fluoride (AHF) is a liquefied gas at room temperature, packaged in metal cylinders, and is used for a number of applications in a wide range of industries

Properties	Units
Chemical Name	Hydrogen Fluoride, HF
CAS Number	7664-39-3
Molecular Formula	AHF
Molecular Weight	20.01 grams/mol
Synonyms:	Hydrogen Fluoride Anhydrous, Hydrofluoric acid
Product Specifications*	$\geq 99.95\%$ ≤ 80 ppm water, H ₂ O ≤ 10 ppm Arsenic, As
Packaging format	Size 35 cylinders – Tonners

*For specific values or requirements, please contact us.

About Inhance Technologies

Inhance Technologies is a leading provider of specialty chemicals, gases and material technologies in a wide range of industries, across four continents.

For more than 40 years, Inhance Technologies' world-class experts have been collaborating with customers globally to create customized solutions and offer exclusive technologies.
