

Hydrofluoric Acid, 30-70%

Description

Hydrofluoric acid, aqueous is a colorless liquid at room temperature, and is used for a number of applications in a wide range of industries.

Properties	Units
Chemical Name	Hydrogen Fluoride
CAS Number	7664-39-3
Molecular Formula	AHF
Molecular Weight	20.01 grams/mol
Synonyms:	Hydrofluoric acid, aqueous
Product Specifications*	30-70% hydrogen fluoride, HF 30-70% water, H ₂ O ≤ 7 ppm Arsenic, As
Packaging format	Polydrums, Totes, IBC
